Enclosed are 3 components of suggestions for additional effort in this area. Comments to the 1st Cut brainstorming were synthesized and you now have all elements under consideration.

As previously stated, the sense of many is that testimony, submissions, witnesses, comments, etc. are necessary but may not move the proposed regulations. The enclosures list options to generate the needed support to do so.

Since this is still in the brainstorming/discussion stage, comments on the entire proposal(additions, deletions, amendments, etc.) are now welcome. We need to have your additional comments back by NOON, FRIDAY 4/29 to prepare for the next meeting which could formally adopt an industrywide plan. Please cc: Tony Andrade with responses.

Any questions, let me know. Thanks.
